Erratum

‘Equipment Review: A user-designed resuscitation unit’ by S. M. MacVicar, M. P. Watts & C. S. Watt (*Archives of Emergency Medicine*, 1986, **3**, 203–207) contained an error. This occurred on page 206, line 16, where ‘£7300’ should correctly read ‘£730’.

It should be noted that the defibrillator/monitor/recorder chosen for this piece of equipment was a Cardiac Recorders 2006 Defibrillator/Monitor/Recorder Unit. This machine does not fully meet Part 1 of the BS5724 and neither does it meet the Part 2 requirements which will come into operation in April 1987. Cardiac Recorders have advised that they have no intention of upgrading this model to comply with Part 2 and that they now consider this to be an old and out-of-date model themselves. It is to be discontinued in favour of subsequent models.
