K. I. Maull, Department of Surgery, University of Tennessee Memorial Research Center and Hospital, Knoxville, Tennessee, 37920, USA.
B. M. T. Rowat, Director of Emergency Services, Toronto General Hospital, College Street, Toronto, Ontario, Canada.
H. B. Stoner, MRC Trauma Unit, University of Manchester Medical School, Stopford Building, Oxford Road, Manchester M13 9PT.
D. H. Wilson, Accident & Emergency Department, General Infirmary, Great George Street, Leeds L21 3ES.
D. W. Yates, Accident & Emergency Department, Hope Hospital, Eccles Old Road, Salford M6 8HD.

Archives of Emergency Medicine provides a forum for the publication, dissemination and discussion of original clinical and scientific research on all aspects of the subject. Particular emphasis is placed on the acute phase of surgical, medical, paediatric, obstetric and psychiatric emergencies, especially in relation to the diagnosis and management of the acutely ill. It is intended that resuscitation be a major component of the scientific content. The Journal, which has been adopted by the Emergency Medicine Research Society and the Australian College of Emergency Physicians, publishes both original papers and review articles. Case reports or preliminary communications will be accepted if sufficiently noteworthy or interesting.

Subscription rates The Journal is published quarterly. Four issues form one volume. The 1984 subscription is £50.00 (UK) £60.00 (overseas) and $95.00 (USA and Canada) post free. Current issues for North and South America, the Indian Sub-Continent, Australasia and the Far East are sent by air to regional distribution points from where they are forwarded to subscribers by surface mail. Any back numbers are normally despatched by surface to all regions, except North America and India, where they are sent by air freight.

Editorial correspondence should be directed to the Editor, Dr A. D. Redmond, Department of Accident & Emergency Medicine, Stockport Infirmary, Stockport, SK1 3UJ.

Business matters, including correspondence and remittances relating to subscriptions, back numbers and offprints, should be sent to the publishers: Blackwell Scientific Publications Ltd, PO Box 88, Oxford, England.

Advertisement bookings and enquiries to the Advertisement Manager, Blackwell Scientific Publications Ltd, Osney Mead, Oxford OX2 0EL, England (Tel. 0865-240201).

Post Master Please send address corrections to Archives of Emergency Medicine, c/o Expeditors of the Printed Word Ltd, 527 Madison Avenue, Suite 1217, New York, NY 10022 (US mailing agent).

Subject Index

Airway problems, laryngeal mask airway, 229
Analgesics, cost, safety and potency of, 197
Blood glucose estimation, hyperglycaemia from, 97
Book review: A Colour Atlas of Poisonous Plants, 233
Cardiac arrest, studies into mechanisms of, 79
Cardiopulmonary resuscitation, 17
Casualties caused by a gale, 57
Chest injuries, effects of on pulmonary function in man, 29
Crash helmets, effect of rebreathing on psychomotor skills when wearing, 101
Drowning, resuscitation from, 113
Elderly patients:
dependency and support of, 205;
with proximal femoral fracture, 215
Equipment reviews:
  Chest drainage catheter Mallinckrodt (UK) Ltd, 61;
  The Robertshaw demand valve, 117;
  Pocket mask ventilation, 161;
  Tablident, 237
Femoral fracture in the elderly, 215
Finger prick blood glucose estimation,
  hyperglycaemia from, 97
Foot, water on, 225
Fracture, proximal femoral in the elderly, 215
Gale, casualties caused by, 57
Gastric lavage, 65, 234, 235
Gout, acute, 89
Haemothorax, splenic rupture presenting as, 53
Hand-washing patterns, and infection control, 157
Head injuries, management of by neurosurgeons, 123
Hyperglycaemia, from finger prick blood glucose estimation, 97
Infection:
  control, and hand-washing patterns, 157;
  of wounds following surgery, 23
Inflatable splints, 151
Injuries, sports, 105
Laryngeal mask airway, 229
Lavage, gastric, 65, 234, 235
Letters to the editor:
  Adams, Rosemary H. M. Abandon gastric lavage in the accident and emergency department? 234;
  Proudfoot, A. T. Abandon gastric lavage in the accident and emergency department? 235;
  Rowat, B. M. T. re University Association for Emergency Medicine, 236
Lymphatic vessel, rupture of foot, 225
MAST, 39
Medical (military) anti-shock trousers, 39
Neurosurgeons, management of head injuries by, 123
Plasma kallikrein kinin system, 135
Prognosis, in the elderly with proximal femoral fracture, 215
Proximal femoral fracture, in the elderly, 215
Psychomotor skills, when wearing crash helmets, effect of rebreathing on, 101
Pulmonary function, in man, effects of chest injuries on, 29
Subject Index

Rebreathing, effect of on psychomotor skills when wearing integral crash helmets, 101
Research:
in accident and emergency medicine, priorities for, 73;
on trauma, therapeutic implications of, 5
Resuscitation:
cardiopulmonary, 17;
from drowning, 113
Rupture, splenic, presenting as haemothorax, 53
Ruptured lymphatic vessel, of foot, 225
'Scientific basis of the care of the critically ill', International Meeting, 165
Shock, medical anti-shock trousers, 39
Splenectomy, presenting as haemothorax, 53
Spints, inflatable, 151
Sports injuries, 105
Spurious hyperglycaemia, from finger prick blood glucose estimation, 97
Surgery, infection of wound following, 23
Therapeutic implications, of trauma research, 5
Trauma research, therapeutic implications of, 5
University Association for Emergency Medicine, 236
Water, on the foot, 225
Wound infection, following surgery, 23
X-rays, necessity of, 143
Manuscripts should be sent to the Editor of Archives of Emergency Medicine, Dr A. D. Redmond, Department of Accident & Emergency Medicine, Stockport Infirmary, Stockport, SK1 3UJ. Contributors must send three complete copies of the text, tables and figures and retain one copy as the Editor does not accept responsibility for damage or loss of papers submitted. Manuscripts must be typewritten on one side of the paper only, with wide margins, be double-spaced, and bear the title of the paper and name and address of the author(s), together with the name of the hospital, laboratory or institution where the work has been carried out. The name and full postal address of the author to whom readers should address correspondence and offprint requests should be given on the first page; this will appear as a footnote in the Journal and the publishers will send the proofs to this author and address unless contrary instructions are written on the manuscript. An informative summary of not more than 200 words must be included, and should appear at the beginning of the paper, immediately after the title. The Editorial Board reserves the right to make literary changes. Papers should normally be divided into summary, introduction, methods (and/or materials), results, discussion, acknowledgements and references. SI units should be used throughout. The relative importance of headings must be clearly indicated. The main categories of heading are capitals, side bold and side italics. If necessary, small capitals may be used for subsidiary main headings.

Illustrations should be referred to in text as, e.g., Fig. 2, Figs 2–7, using Arabic numbers. Each figure could be a reference number corresponding to a similar number in the text, and should be marked on the back with the name(s) of the author(s) and the title of the paper. Where there is doubt as to the orientation of an illustration the top should be marked with an arrow. Photographs and photomicrographs should be unmounted and prints should not be retouched. Colour illustrations are not acceptable. Diagrams should be on separate sheets; they should be drawn with black ink on white paper and should be at least twice the size of the final reproduction. Lines should be of sufficient thickness to stand reduction. Each illustration should be accompanied by a legend clearly describing it; these legends should be grouped on a separate sheet of paper.

Legends should be as few as possible and should include only essential data; they should be typewritten on separate sheets and should be given in Roman numerals. A list of illustrations and tables should accompany the manuscript.

References Only papers closely related to the author’s work should be referred to and exhaustive lists should be avoided. References should be made by giving the author’s surname with the year of publication in parentheses. Where the reference contains more than two authors it should be given at each mention in the text with only the first surname, plus et al., e.g. Jones et al. (1948). If several papers by the same author(s) and from the same year, or by the same first author but different subsequent authors in the same year are cited, a, b, c, etc. should be put after the year of publication, e.g. Jones et al. (1948a,b). All references should be brought together at the end of the paper in alphabetical order, with titles of journals spelt out in full and with both first and last page numbers given. When more than one reference is made in the text to a book or monograph, referring to different pages, etc., each textual reference should contain the author’s surname and the year of publication and the appropriate page number; the complete reference is thus cited only once at the end of the paper.

Animal Experiments Papers describing animal experiments on vertebrates can be accepted for publication only if the experiments conform with the legal requirements in the UK. Authors must provide a full description of their anaesthetic and surgical procedures. They must also provide evidence that they took adequate steps to ensure that animals did not suffer unnecessarily at any stage of the experiment.

Proofs will be submitted to the author responsible for proof-correction (see under Manuscripts) and should be returned to the Editor within three days. Major alterations from the text cannot be accepted.

Offprints Twenty-five offprints of each paper are supplied free, but additional copies may be purchased if ordered on the printed card which will be sent to the author with the proof.
