The *Journal of Accident and Emergency Medicine* publishes articles on all aspects of emergency medicine. The emphasis is on original research of a high scientific standard. Papers also include short reports, case reports, review articles and occasional papers dealing with specific aspects of emergency care. The Journal aims to represent all specialties involved in emergency care, both in the pre-hospital and the hospital environment. It has an international readership and articles reflecting the global perspective are particularly welcomed. Authors are invited to submit all work which will contribute to the progress of emergency medicine worldwide. The *Journal of Accident and Emergency Medicine* is the official Journal of the British Association for Accident and Emergency Medicine and the Emergency Medicine Research Society. The views contained in the Journal are those of the authors and should not be regarded as the official views of the Association.

SUBSCRIPTION INFORMATION. *Journal of Accident and Emergency Medicine* is published quarterly (one volume per annum) and the subscription prices for 1994 are £140.00 (Europe), £154.00 (rest of world) and \$229.00 (USA and Canada), in all cases post free. Subscribers in Canada must add 7% to the subscription price, to allow for GST. Subscribers in Europe must quote their VAT registration number or state that they are not registered. Subscribers in The Netherlands who are not VAT registered must add 6% to the subscription price, to allow for VAT. Orders for current subscriptions and back issues should be sent to Blackwell Scientific Publications Ltd, Journal Subscriptions Department, Marston Book Services, PO Box 87, Oxford OX2 0DT, UK, all other business correspondence, including orders for offprints and advertising space, should be addressed to *Journal*

of Accident and Emergency Medicine, Blackwell Scientific Publications Ltd., Osney Mead, Oxford OX2 0EL (Telephone [01865] 206206; Telex 83355 Medbok G; Fax [01865] 721205). The Journal is despatched within Europe by surface mail, to other continents by various forms of air speeded delivery, to the US* by air freight for forwarding by second-class post, to India by air freight for guaranteed local delivery and to all other countries by Accelerated Surface Post.

*Post Master, send address changes to: *Journal of Accident and Emergency Medicine* c/o Mercury Airfreight International Ltd., 2323 EF Randolph Avenue, Avenel NJ07001 (US Mailing Agent) Second Class postage paid at Rahway NJ.

This consent does not extend to other kinds of copying, such as copying for general distribution for advertising or promotional purposes, for creating new collective works or for resale. Special requests should be addressed to the Managing Editor. 0264-4924/94 \$10.50.

The Publisher's Policy is to use acid-free permanent paper, to the draft standard ISO/DIS 9706, made from sustainable forests using chlorine-free pulp. The paper used in this journal has an ECO-CHECK 4 Star rating.

THE QUEEN ELIZABETH HOSPITAL

REGISTRARS

Senior Trainee Positions – Emergency Medicine

The Queen Elizabeth Hospital in Adelaide, South Australia, is seeking Registrars for six to 12-month rotations in the Emergency Department. Applicants should have at least two years experience subsequent to obtaining full registration, preferably including one or more years of Emergency Department or Anaesthetic experience. Adelaide is bordered by beautiful beaches, world renowned wineries and has a delightful Mediterranean climate.

The Queen Elizabeth Hospital is a 450-bed teaching hospital affiliated with the University of Adelaide. The Emergency Department sees approximately 40,000 patients per year and is accredited for training by the Australasian College for Emergency Medicine. The department is staffed by Consultants, Registrars, Resident Medical Officers and Interns.

Registrars are rostered to work a minimum of 43 hours per week on rotating shifts. Conditions of service are governed by the South Australian Medical Officers Award. Salary range for Registrars is \$A39,938 - \$A53,791 per year depending on years of experience. Thirty-five days paid annual leave per year is included as an award entitlement. The department holds a number of educational programs each week, which trainees are encouraged to attend.

The Medical Administration Department at The Queen Elizabeth Hospital will assist interested applicants in obtaining occupational trainee entry visas and in obtaining limited registration to practice in South Australia. This process will require approximately 12 weeks advance notice.

If interested, please contact Dr Marie Kuhn, Director, Emergency Department, The Queen Elizabeth Hospital, 28 Woodville Road, Woodville, South Australia 5011, telephone (08) 222 7113, facsimile (08) 222 6034.

The Queen Elizabeth Hospital is an equal opportunity employer and maintains a smoke-free environment.

CH15445

THE ROYAL COLLEGE OF SURGEONS OF EDINBURGH

FELLOWSHIP EXAMINATION IN ACCIDENT AND EMERGENCY MEDICINE AND SURGERY

A diet of the Fellowship Examination in Accident and Emergency Medicine and Surgery organised jointly by the Royal College of Surgeons of Edinburgh and the Royal College of Physicians of Edinburgh will commence on 8 May 1995.

This is an additional option in the present Fellowship Examination and is designed to test all aspects of the work of an Accident and Emergency Department.

Candidates must have been engaged in the study of their profession for a period of not less than four years and must have passed a Section A/Part I MRCP(UK) or recognised equivalent.

The application form, examinations calendar and Regulations are available on request from the Examinations Secretary, The Royal College of Surgeons of Edinburgh, Nicolson Street, Edinburgh EH8 9DW.

Applications for entry must be received by 10 March 1995.

Fee: £360.00

The Alison Gourdie Scholarship

Applications are invited from doctors and nurses working in the field of accident and emergency medicine for the above scholarship. A grant of £1200 is available to allow travel for a period of study away from the applicant's base hospital.

Application forms and further details are available from :

*Faculty of Accident and Emergency Medicine, Royal
College of Surgeons of England, 35-34 Lincoln's Inn
Fields, London WC2A 3PM, UK.*

GUIDELINES FOR AUTHORS

Submission of manuscripts

The journal will consider for publication original papers, review articles, case reports, short reports, equipment reviews and book reviews in the field of international emergency medicine. Letters to the Editor will be considered. Authors are requested to supply full references to any articles that are cited. Letters may be edited. The original and two copies should be submitted together with a covering letter signed by the first author. All papers and correspondence should be sent to: Editorial Office, *Journal of Accident and Emergency Medicine*, Blackwell Scientific Publications, 23 Ainslie Place, Edinburgh EH3 6AJ, UK. Tel: 0131-226 7232 and Fax: 0131-226 3803.

Please inform the editorial office immediately of any change of address.

Preparation of manuscripts

Manuscripts must be written in English. It is recommended that non-English speaking authors have their manuscripts revised by an English speaking person. Manuscripts must be typewritten on one side of A4 paper with wide margins and double spacing. All pages should be numbered consecutively.

The title page should contain: a full title; a running title of not more than 50 characters including spaces; the names of each author; the name and full postal address of the hospital/institution; and the name, telephone and fax numbers (if available) and full postal address of the person to whom correspondence, proofs and offprint requests should be addressed.

The second page should contain an abstract of not more than 150 words. Followed by up to six keywords in alphabetical order. Subsequent pages should contain the following: introduction, subjects and methods, results, discussion, acknowledgements, references, tables, figures, figure legends and clearly marked photostat copies of the figures. There should be minimal duplication of results between text, tables and figures.

Authors are requested to restrict the length of articles as far as possible according to the following guidelines: original papers (1500–2500 words); review articles (3000–5000 words); short reports (500–1000 words); case reports (500–1000 words); equipment reviews (500–1000 words); and book reviews (500 words).

Submission on disk

Manuscripts will be accepted on disk. Further details can be obtained from the Editorial Office.

References

Only closely related and essential references should be quoted. In the text, references should appear as superscript numbers and, correspondingly, in the reference list they must be numbered consecutively, i.e. in the order in which they appear in the text. The reference list should be in numerical order in the following style:

(1) Journal article

1. Dallos V. & Mouzas G.L. (1981) An evaluation of the function of the short stay observation ward. *British Medical Journal* **282**, 37–40.

(2) Chapter in book

2. Maslanka A.M. (1993) Hypertension/hypertensive emergencies. In: Markovchick V.J., Pons P.T. & Wolfe

R.E. (eds) *Emergency Medicine Secrets*, pp. 104–107. Hanley & Belfus, Philadelphia.

It is the first author's responsibility to check the accuracy of all references in the manuscript and the proofs. Manuscripts not yet in press, papers reported at meetings and personal communications, may be cited in the text with the author's initials and surname and not as a formal reference.

Tables

Written consent to republication must be obtained by the first author from the copyright holder (usually the publishers) and the authors if any table or illustration has been published elsewhere. Tables should be numbered consecutively in Arabic numerals (e.g. Table 1) within the text and typed on separate sheets. They must be accompanied by an appropriate short caption. Only horizontal lines should be used; one above and one below the column heading and one at the table foot. All abbreviations should be explained in a footnote.

Figures

Figures should also be numbered consecutively in Arabic numerals (e.g. Fig. 1) within the text and drawn on separate sheets. Each figure should be marked on the back with its number, orientation, author(s) and title of the manuscript. Line drawing should be either drawn by hand in black ink or produced on a good quality printer. Lettering should be no less than 4mm high. Figures should be capable of being reduced to fit either a single (72mm) or a double (150mm) column. Photographs (and prints of radiographs) should be unmounted, good quality, black and white, glossy prints. Arrows should be used where interpretation may present problems.

Units/spelling

All measurements should be in SI units in both text and figures. Negative indices should be used (e.g. mg h⁻¹). Numbers are written in full up to nine, numerals are used from 10 upwards. Abbreviations should be kept to a minimum and must be written in full at the beginning of the sentence.

Statistics

The methods of statistical analysis must be defined in the methods section of the manuscript. Those not in common use must be described in detail or supported by references. Authors are responsible for the validity of statistics.

Proofs and reprints

Proofs will be sent to the first or corresponding author and must be returned within 3 days of receipt. Major alterations to the text cannot be accepted. Twenty-five free offprints of the paper will be supplied to the first or corresponding author. Additional offprints may be ordered when proofs are returned.

Extraction services

The journal is covered by *Index Medicus*, *MEDLINE* and *Current Contents Clinical Practice*.
