Merck Manual TextStack

Based on *The Merck Manual, 16th Edition*

Written by over 200 physicians with expertise in a variety of specialities, the *Merck Manual* provides concise, up-to-date information - including the aetiology, symptoms, diagnostic procedures and treatment methods - for virtually every disease and condition known to mankind. This wealth of information has now been incorporated into powerful searching and customisation tools by Keyboard Publishing to provide a readily accessible electronic edition of this standard reference work.

The *TextStack* comprises the full text of the *Merck Manual*, complete with all tables, figures and diagrams. Enter any search term e.g. a symptom, a drug name or condition, to search either a part or the entirety of the *TextStack* to find all relevant information. Alternatively, browse the Table of Contents or Index to find the information which is of interest. Technical support is available for all our electronic products.

- **Instant access to over 2700 pages of the *Merck Manual* including 600 tables, figures and diagrams**
- **Mark information for future reference by adding bookmarks and annotations**
- **Use the Transcriber to create electronic lessons or customised tours through the *TextStack***
- **Customise the information - export information to a word-processor to build electronic notebooks, reports or create patient and student hand-outs**
- **Easy to use interface with context-sensitive help**

Hardware and software requirements:

Windows variants: you will need an IBM-compatible PC (80386 or higher) with at least 4MB RAM and a hard drive, running Windows 3.1 or later and MS DOS 3.3 or later.

Macintosh Variants: you will need a Macintosh computer (68030) or higher with 2.5 MB of free RAM and a hard drive, running system 7.0 or later.

Electronic Publications from Blackwell Science

I spend too much time looking for answers.

MICROMEDEX computerised information systems bring a library of up-to-date, fully-referenced acute care information databases to your fingertips.

DATABASES THAT SAVE TIME

- Current, comprehensive information for healthcare professionals
- Simple, menu-driven, on-screen instructions mean instant access to full text, fully-referenced documents

ONGOING, UP-TO-DATE RESEARCH

- Full-time medical editors continually review the world's leading medical literature
- Worldwide, 350 practicing clinicians evaluate new information, track and report clinical trends, and report on their specialty area
- Updated materials are distributed to customers quarterly

CURRENT DATA HELPS IMPROVE PATIENT CARE

- Information instantly available, in your facility, 24 hours each day

RELIED UPON WORLDWIDE

- Every day, in more than 70 countries, thousands of pharmacists, physicians, and nurses depend on acute care, toxicology, and drug information databases from MICROMEDEX

MICROMEDEX Acute Care Information Databases

AfterCare™ Instructions - includes simple-to-use guidelines for self-care and drug information that healthcare professionals can distribute to patients who have been discharged.

EMERGINDEX® System - contains data and abstracts for the practice of acute care medicine, including presentation and treatment for over 400 illnesses and injuries.

POISINDEX® System - presents internationally recognized treatment protocols and ingredient information for more than 750,000 commercial, biological, and pharmaceutical substances.

TOMES® System - provides fully-evaluated monographs, and medical toxicology and hazard managements for use in the event of exposures to hazardous chemicals.
