

I spend too much time looking for answers.

MICROMEDEX computerised information systems bring a library of peer-reviewed, fully referenced acute care information databases together in a single source.

DATABASES THAT SAVE TIME

- Current, comprehensive information for healthcare professionals
- Simple, menu-driven, on-screen instructions mean instant access to full text, fully-referenced documents

ONGOING, UP-TO-DATE RESEARCH

- Full-time medical editors continually review the world's leading medical literature
- Worldwide, 350 practicing clinicians evaluate new information, track and report clinical trends, and report on their specialty area
- Updated materials are distributed to customers quarterly

CURRENT DATA HELPS IMPROVE PATIENT CARE

- Information instantly available, in your facility, 24 hours each day

RELIED UPON WORLDWIDE

- Every day, in more than 70 countries, thousands of pharmacists, physicians, and nurses depend on acute care, toxicology, and drug information databases from MICROMEDEX

MICROMEDEX Acute Care Information Databases

AfterCare™ Instructions - includes simple-to-use guidelines for self-care and drug information that healthcare professionals can distribute to patients who have been discharged.

EMERGINDEX® System - contains data and abstracts for the practice of acute care medicine, including presentation and treatment for over 400 illnesses and injuries.

POISINDEX® System - presents internationally recognized treatment protocols and ingredient information for more than 750,000 commercial, biological, and pharmaceutical substances.

TOMES® System - provides fully-evaluated monographs, and medical toxicology and hazard managements for use in the event of exposures to hazardous chemicals.
