Merck Manual TextStack

Based on *The Merck Manual, 16th Edition*

Written by over 200 physicians with expertise in a variety of specialities, the *Merck Manual* provides concise, up-to-date information - including the aetiology, symptoms, diagnostic procedures and treatment methods - for virtually every disease and condition known to mankind. This wealth of information has now been incorporated into powerful searching and customisation tools by Keyboard Publishing to provide a readily accessible electronic edition of this standard reference work.

The *TextStack* comprises the full text of the *Merck Manual*, complete with all tables, figures and diagrams. Enter any search term e.g. a symptom, a drug name or condition, to search either a part or the entirety of the *TextStack* to find all relevant information. Alternatively, browse the Table of Contents or Index to find the information which is of interest. Technical support is available for all our electronic products.

- **Instant access to over 2700 pages of the *Merck Manual* including 600 tables, figures and diagrams**
- **Mark information for future reference by adding bookmarks and annotations**
- **Use the Transcriber to create electronic lessons or customised tours through the *TextStack***
- **Customise the information - export information to a word-processor to build electronic notebooks, reports or create patient and student hand-outs**
- **Easy to use interface with context-sensitive help**

Hardware and software requirements:

Windows variants: you will need an IBM-compatible PC (80386 or higher) with at least 4MB RAM and a hard drive, running Windows 3.1 or later and MS DOS 3.3 or later.

Macintosh Variants: you will need a Macintosh computer (68030) or higher with 2.5 MB of free RAM and a hard drive, running system 7.0 or later.

The British Journal of SURGERY

Published by Blackwell Science for the British Journal of Surgery Society.

Senior Editor:
R C N Williamson, London
Editor:
*J R Farndon, Bristol***Review Editor:**
J A Murie, Edinburgh
European Editor:
C D Johnson, Southampton

The British Journal of Surgery, now in its 82nd year of publication, is the premier general surgical journal in Europe, and is among the top surgical periodicals in the world. Its international readership is reflected in the prestigious international Editorial Board, supported by a panel of over 900 reviewers world-wide. Top quality clinical and research papers on all aspects of general surgery and other related topics are featured, while developing areas such as minimally invasive therapy and interventional radiology are also strongly represented. The inclusion of Leading Articles, Reviews, Original Articles, Surgical Workshops, Case Reports, Short Notes and Articles for Debate means that *The British Journal of Surgery* offers an appropriate format for any length or type of submission: in addition there are abstracts from key meetings, quarterly Digests from other major journals, correspondence, book reviews and conference dates. *The British Journal of Surgery* will be of interest not only to general surgeons, but also to those working in related fields such as radiologists, oncologists, physiologists and pathologists.

SUBSCRIPTION INFORMATION

I spend too much time looking for answers.

MICROMEDEX computerised information systems bring a library of peer-reviewed, fully referenced acute care information databases together in a single source.

DATABASES THAT SAVE TIME

- Current, comprehensive information for healthcare professionals
- Simple, menu-driven, on-screen instructions mean instant access to full text, fully-referenced documents

ONGOING, UP-TO-DATE RESEARCH

- Full-time medical editors continually review the world's leading medical literature
- Worldwide, 350 practicing clinicians evaluate new information, track and report clinical trends, and report on their speciality area
- Updated materials are distributed to customers quarterly

CURRENT DATA HELPS IMPROVE PATIENT CARE

- Information instantly available, in your facility, 24 hours each day

RELIED UPON WORLDWIDE

- Every day, in more than 70 countries, thousands of pharmacists, physicians, and nurses depend on acute care, toxicology, and drug information databases from MICROMEDEX

MICROMEDEX Acute Care Information Databases

AfterCare™ Instructions - includes simple-to-use guidelines for self-care and drug information that healthcare professionals can distribute to patients who have been discharged.

EMERGINDEX™ System - contains data and abstracts for the practice of acute care medicine, including presentation and treatment for over 400 illnesses and injuries.

POISINDEX™ System - presents internationally recognized treatment protocols and ingredient information for more than 750,000 commercial, biological, and pharmaceutical substances.

TOMES™ System - provides fully-evaluated monographs, and medical toxicology and hazard managements for use in the event of exposures to hazardous chemicals.
