

## Data Supplement 1. Survey Instrument

### Survey: Dyad to Triad Study

#### Consent to Participation

You are invited to complete a survey on clinical practice as part of a research study on the effect of privacy in the emergency department. This research study is being conducted by Hanni Stoklosa, MD, MPH and J. Stephen Bohan, MD, MS, physicians at Brigham and Women's Hospital. Your responses will help us learn more about privacy considerations in caring for patients in the emergency department. We are recruiting emergency clinicians, including nurses, physicians, and physician assistants. We are contacting you through your affiliation with a national association in your profession. It should take approximately 3 minutes to complete and you will not be paid for your participation.

- I agree to participate in this research.
- I do not agree to participate in this research.

#### Section 1 - Patient Interview

When interviewing a patient, has the presence of the patient's family member, friend or other accompanying individuals ever caused you to alter or omit a question?

- Yes
- No

If No Is Selected, Then Skip to Section 2

**1A.** Are you more likely to alter or omit questions when

The patient is located in the hallway?

- Never
- Rarely
- Sometimes
- Often
- All of the Time

**1B.** Are you more likely to alter or omit questions when

Someone known to the patient (family/friend/acquaintance) is present

- Never
- Rarely
- Sometimes
- Often
- All of the Time

**1C.** Are you more likely to alter or omit questions when

The patient's gender is:

- Male
- Female
- Neither. The patient's gender plays no role

1D. When you altered or omitted a question, did it ever lead to any delay or failure to diagnose that you are aware of?

- Yes
- No

If No Is Selected, Then Skip to Section 2

**1E.** If YES to delay, Was the delay:

- Minutes
- Hours
- Days

**1F.** If YES to "failure to diagnose"

To which of the following Medical System was it related?

- None - Was not related with a Medical System
- Neurologic
- Cardiovascular
- Pulmonary
- Gastroenterological
- Genitourinary
- Musculoskeletal
- Dermatologic
- Other - Please elaborate \_\_\_\_\_

**1G.** If YES to "failure to diagnose"

To which of the following Psychiatric Conditions was it related?

- None - Was not related with a Psychiatric Condition
- Suicidal Ideation or Self-Harm
- Homicidal Ideation or Harm to Others
- Auditory or Visual Hallucination
- Delusions
- Psychosis
- Other - Please elaborate \_\_\_\_\_

**1H.** If YES to "failure to diagnose"

To which of the following Social Issue was it related?

- None - Was not related with a Social Issue
- Domestic Violence/Intimate Partner Violence
- Child Abuse
- Human Trafficking
- Elder Abuse
- Substance Abuse
- Other - Please elaborate \_\_\_\_\_

## Section 2- Physical Exam

When examining a patient, has the presence of a patient's family member, friend or other accompanying individual ever caused you to alter your physical exam? (This includes not performing an element of the physical exam, or performing it in an abbreviated manner e.g not undressing the patient)

- Yes
- No

If No Is Selected, Then Skip to Section 3

**2A.** Are you more likely to alter your assessment when

The patient is in the hallway?

- Never
- Rarely
- Sometimes
- Often
- All of the Time

**2B.** Are you more likely to alter your assessment when

Someone known to the patient (family/friend/acquaintance) is present?

- Never
- Rarely
- Sometimes
- Often
- All of the Time

**2C.** Are you more likely to alter your assessment when

The patient is

- Male
- Female
- Neither. The patient's gender plays no role.

**2D.** When you alter the physical exam, did it ever lead to a delay or failure to diagnose that you are aware of?

- Yes
- No

If No Is Selected, Then Skip to Section 3

**2E.** If YES to "delay"

Was the delay

- Minutes
- Hours
- Days

**2F.** If YES to "failure to diagnose"

To which of the following Medical System was it related?

- None - Was not related with a Medical System
- Neurologic
- Cardiovascular
- Pulmonary
- Gastroenterological
- Genitourinary
- Musculoskeletal
- Dermatologic
- Other - Please elaborate \_\_\_\_\_

**2G.** If YES to "failure to diagnose"

To which of the following Psychiatric Conditions was it related?

- None - Was not related with a Psychiatric Condition
- Suicidal Ideation or Self-Harm
- Homicidal Ideation or Harm to Others
- Auditory or Visual Hallucination
- Delusions
- Psychosis
- Other - Please elaborate \_\_\_\_\_

**2H.** If YES to "failure to diagnose"

To which of the following Social Issue was it related?

- None - Was not related with a Social Issue
- Domestic Violence/Intimate Partner Violence
- Child Abuse
- Human Trafficking
- Elder Abuse
- Substance Abuse
- Other - Please elaborate \_\_\_\_\_

### **Section 3 - Practice and Demographic Information**

**3A.** How many years have you practiced clinically in an emergency department setting after medical school? \_\_\_\_\_

**3B.** How often do you evaluate patients in the hallway?

- Never
- Rarely
- Sometimes
- Often
- All of the Time

**3C.** What is your gender?

- Male
- Female

**3D.** Comments or anecdotes you would like to share related with your responses above?  
(optional)
