V1 06022018

1. Is there a standard routine trust-wide protocol for the emergency management of a patient who has self-harmed in your trust?
2. Are there any local management or referral pathways specific to self-harm in place or being developed in your service? If yes, please describe the management or referral pathway in full including:
 - a. When was the management or referral pathway introduced?
 - b. Who is eligible for the management or referral pathway and what are the exclusion criteria?
 - c. What (geographical) areas use the management or referral pathway?
 - d. What partners are involved?
 - e. What are the hours of operation?
3. Is your ambulance service currently carrying out any evaluations of self-harm emergency management options? What are the difficulties or challenges with doing this? Please send reports/data
4. Is there anything else in relation to self-harm care by ambulance services that you think might be relevant or of interest or that you'd like to mention?
5. If any initiatives are in place, would you be interested in taking part in a study we are setting up to trial a self-harm intervention? If so, who would be the main contact point for this?

Many thanks,

Alex Glendenning
