D. W. Yates, Accident & Emergency Department, Hope Hospital, Eccles Old Road, Salford M6 8HD, England.

Archives of Emergency Medicine provides a forum for the publication, dissemination and discussion of original clinical and scientific research on all aspects of the subject. Particular emphasis is placed on the acute phase of surgical, medical, paediatric, obstetric and psychiatric emergencies, especially in relation to the diagnosis and management of the acutely ill. It is intended that resuscitation be a major component of the scientific content. The Journal, which has been adopted by the Casualty Surgeons Association, the Emergency Medicine Research Society and the Australian College of Emergency Physicians, publishes both original papers and review articles. Case reports or preliminary communications will be accepted if sufficiently noteworthy or interesting.

Subscription rates. The Journal is published quarterly. Four issues form one volume. The 1987 subscription rate is £56.00 (UK) and £67.50 (overseas) and $95.00 (USA, Canada & Japan) post free. Orders for subscriptions in the USA and Canada should be sent to Year Book Medical Publishers, 35 East Wacker Drive, Chicago, Illinois 60601. USA. The Journal is delivered to North America by accelerated surface post and subscribers there can expect to receive their copies within 2 weeks of British publication. Current issues for the Indian sub-continent, Australasia and the Far East are sent by air to regional distribution points from where they are forwarded to subscribers by surface mail. Any back numbers are normally despatched surface to all regions, except North America, where they are sent by a.s.p., and India, where they are by air freight.

Editorial correspondence should be directed to the Editor, Dr A. D. Redmond, Department of Accident Emergency Medicine, University Hospital of South Manchester, West Didsbury, Manchester M20 8H England.

Business matters, including correspondence and remittances relating to subscriptions, back numbers and offprints, should be sent to the publishers: Blackwell Scientific Publications Ltd, PO Box 88, Oxford, England.

Advertent booking and enquiries to the Advertisement Manager, Blackwell Scientific Publications Ltd, Osney Mead, Oxford OX2 0EL, England (Tel. 0865-240201).

Extraction services. The Journal is covered by Index Medicus, MEDLINE and Current Contents/Clinical Practice.
FORTHCOMING EVENT

2nd International Conference on Emergency Medicine
Brisbane, Australia, 24–28 October 1988

Conference Host: Australasian College of Emergency Medicine

The stimulating and innovative programme will provide registrants with the opportunity to hear renowned speakers addressing 'state of the art' issues. The conference programme will include a range of significant areas of emergency medicine, from resuscitation and toxicology to radiology and research in emergency medicine. It will be enhanced by a trade exhibit to be held in association with the conference.

Subject Index

Abdominal wall, anterior, traumatic intermuscular hernia in, 237
Adolescent drug misuse, 17
Air rifle breech injuries to digits, 193
Analgesia, use of in severe pain, 25
Asthma, acute severe, failed resuscitation in, 233

Book reviews:
Orthopaedic Decision Making, by R. W. Bucholz, Lippert, Wenger & Ezaki, 65;
Cardiac Arrest—What Do You Do?, by J. Gardiner, 66;
Manual of Emergency Orthopaedics, by Phillip M. Segelov, 121;
Manual of Emergency Medicine, by J. L. Jenkins & J. Loscalzo, 121;
A Simple Guide to Trauma, by R. L. Huckstep, 122;
Renal and Urologic Emergencies, by A. E. Wolfson & A. Harwood, 123;
1987 Year Book of Emergency Medicine, by David Wagner, 241
Wound Care, by William M. Cocke Jr, Raleigh R. White IV, Dennis J. Lynch & Charles N. Verheyden, 242
Médecine de Catastrophe, by René Noto, Pierre Huguenard & Alain Larcan, 244

Cardiogenic shock in right ventricular infarction, 107
Cardiopulmonary resuscitation: The Sheffield chair, 151
Deaths in three accident and emergency departments, 227
Diphtheria, 3, 47

Drug misuse in adolescence, 17
Epileptic seizure causing posterior dislocation of shoulder and bilateral hip fractures, 115
Equipment reviews:
The use of a metal locator in an accident and emergency department, 57;
Liquid crystal thermography in the diagnosis of scaphoid fractures, 117
Esophageal tracheal combitube (ETC), 219

Femoral nerve block in the initial management of femoral shaft fractures, 163
Frontal aerocoele as a complication of head injury, 111

Gunshot wounds, civilian, management of in a Nigerian general hospital, 73

Hand clinic, a review of the first 12 months, 211
Hernia, traumatic intermuscular, in the anterior abdominal wall, 237
Hypertension, detection of, 7

Infarction, right ventricular, managed with a combined thermodilution and pacing pulmonary artery flotation catheter, 107
Ingested foreign bodies, radiology of, 33
Intravenous tubing (3-mm diameter) for the rapid infusion of fluids, 173

Knee injury and virus infection, 155

Letters to the Editor:
Bhattacharyya, R. Solcotrans (R) for emergency transfusion, 200;
Chambers, N., Pearce, K. & Perez-Avila, C. A. Blood alcohol levels, 127;
Freeman, C. P. The seat-belt sign, 128;
Hashemi, K. & Harvey, K. Re: 'Hunt the Thimble': a study of the radiology of ingested foreign bodies, 197;

Radiology of ingested foreign bodies, 33
Resuscitation, training in, 137
Resuscitation room, use of for trauma, 83
Royal Society of Medicine, 63

Scalp wounds, open, 11
Self-cutter, acute management of, 39
Self-injection of mercury, 53
Sheffield chair for cardiopulmonary resuscitation, 151
Skull X-rays, utility of, post-trauma, 141
Skull X-rays after mild head injuries, 133
Synthaderm in the management of pre-tibial laceration, 179
Thoracotomy, emergency: medical indication failed resuscitation in acute severe asthma, 253

Training in resuscitation, 137
Trauma, use of the resuscitation room for, 83

Use of the accident and emergency department, 77

Virus infection and knee injury, 155

Wound dressing adherence, 101
Manuscripts should be sent to the Editor of Archives of Emergency Medicine, Dr A. D. Redmond, Department of Accident & Emergency Medicine, University Hospital of South Manchester, West Didsbury, Manchester M20 8LR, England. Contributors must send three complete copies of the text, tables and figures and retain one copy as the Editor does not accept responsibility for damage or loss of papers submitted. Manuscripts must be typewritten on one side of the paper only, with wide margins, be double-spaced, and bear the name of the paper and name and address of the author(s), together with the name of the hospital, laboratory or institution where the work has been carried out. The name and full postal address of the author to whom readers should address correspondence and offprint requests should be given on the first page; this will appear as a footnote in the Journal and the publishers will send the proofs to this author and address unless contrary instructions are written on the manuscript. An informative summary of not more than 200 words must be included, and should appear at the beginning of the paper, immediately after the title. The Editorial Board reserves the right to make literary changes. Papers should normally be divided into summary, introduction, methods (and/or materials), results, discussion, acknowledgements and references. SI units should be used throughout. The relative importance of headings must be clearly indicated. The main categories of heading are capitals, side bold and side italics. If necessary, small capitals may be used for subsidiary main headings.

Illustrations should be referred to in text as, e.g., Fig. 2, Figs 2, 4–7, using Arabic numbers. Each figure should bear a reference number corresponding to a similar number in the text, and should be marked on the back with the name(s) of the author(s) and the title of the paper. Where there is doubt as to the orientation of an illustration the top should be marked with an arrow. Photographs and photomicrographs should be unmounted glossy prints and should not be retouched. Colour illustrations are not acceptable. Diagrams should be on separate sheets; they should be drawn with black ink on white paper and should be at least twice the size of the final reproduction. Lines should be of sufficient thickness to stand reduction. Each illustration should be accompanied by a legend clearly describing it; these legends should be grouped on a separate sheet of paper.

Tables should be as few as possible and should include only essential data; they should be typewritten on separate sheets and should be given in Roman numerals. A list of illustrations and tables should accompany the manuscript.

References Only papers closely related to the author’s work should be referred to and exhaustive lists should be avoided. References should be made by giving the author’s surname with the year of publication in parentheses. Where the reference contains more than two authors it should be given at each mention in the text with only the first surname, plus et al., e.g. Jones et al. (1948). If several papers by the same author(s) and from the same year, or by the same first author but different subsequent authors in the same year are cited, a, b, c, etc. should be put after the year of publication, e.g. Jones et al. (1948a,b). All references should be brought together at the end of the paper in alphabetical order, with titles of journals spelt out in full and with both first and last page numbers given. When more than one reference is made in the text to a book or monograph, referring to different pages, etc., each textual reference should contain the author’s surname and the year of publication and the appropriate page number; the complete reference is thus cited only once at the end of the paper.

Animal experiments Papers describing animal experiments on vertebrates can be accepted for publication only if the experiments conform with the legal requirements in the UK. Authors must provide a full description of their anaesthetic and surgical procedures. They must also provide evidence that they took adequate steps to ensure that animals did not suffer unnecessarily at any stage of the experiment.

Proofs will be submitted to the author responsible for proof-correction (see under Manuscripts) and should be returned to the Editor within three days. Major alterations from the text cannot be accepted.

Offprints Twenty-five offprints of each paper are supplied free, but additional copies may be purchased if ordered on the printed card which will be sent to the author with the proof.
